

ar5210GetTxQueueProps

ar5211GetTxQueueProps

ar5212GetTxQueueProps

ath\_hal\_getTxQProps

```
graph LR; A[ar5210GetTxQueueProps] --> D[ath_hal_getTxQProps]; B[ar5211GetTxQueueProps] --> D; C[ar5212GetTxQueueProps] --> D;
```

The diagram illustrates a pointer relationship where three specific hardware driver functions (ar5210, ar5211, and ar5212) all point to a common, shared hardware abstraction function (ath\_hal\_getTxQProps). The target function is highlighted in gray, indicating it is the common implementation.
