

dev/fb/fb_if.m

```
graph TD; A[dev/fb/fb_if.m] --> B[sys/bus.h]; A --> C[sys/fbio.h];
```

The diagram illustrates a dependency relationship. At the top, a grey rectangular box contains the text 'dev/fb/fb_if.m'. Two blue arrows originate from the bottom edge of this box. The left arrow points to a white rectangular box containing 'sys/bus.h'. The right arrow points to another white rectangular box containing 'sys/fbio.h'. This indicates that the module 'dev/fb/fb_if.m' depends on both 'sys/bus.h' and 'sys/fbio.h'.

sys/bus.h

sys/fbio.h
