

fdt_get_mem_regions

fdt_get_reserved_mem

fdt_get_reserved_regions

fdt_data_to_res

```
graph LR; A[fdt_get_mem_regions] --> D[fdt_data_to_res]; B[fdt_get_reserved_mem] --> D; C[fdt_get_reserved_regions] --> D;
```

The diagram illustrates a dependency or data flow. Three source functions on the left are connected by blue arrows to a single target function on the right. The target function, 'fdt_data_to_res', is highlighted with a gray background, while the source functions have white backgrounds. The arrows originate from the right side of each source box and point towards the left side of the target box.
