

g\_mirror\_config

```
graph LR; A[g_mirror_config] --> B[g_mirror_ctl_insert];
```

The diagram consists of two rectangular boxes connected by a blue arrow. The left box is white with a black border and contains the text 'g\_mirror\_config'. A blue arrow points from the right side of this box to the left side of the right box. The right box is gray with a black border and contains the text 'g\_mirror\_ctl\_insert'.

g\_mirror\_ctl\_insert
