

sys\_extattr\_get\_file

sys\_extattr\_get\_link

kern\_extattr\_get\_path

```
graph LR; A[sys_extattr_get_file] --> C[kern_extattr_get_path]; B[sys_extattr_get_link] --> C;
```

The diagram illustrates a mapping from system calls to a kernel function. On the left, two white rectangular boxes with black borders contain the text 'sys\_extattr\_get\_file' (top) and 'sys\_extattr\_get\_link' (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box with a black border on the right, which contains the text 'kern\_extattr\_get\_path'. This indicates that both system calls are implemented by or delegate to the kernel function 'kern\_extattr\_get\_path'.
