

syscall_module_handler

```
graph LR; A[syscall_module_handler] --> B[kern_syscall_module_handler]
```

The diagram consists of two rectangular boxes connected by a blue arrow. The left box is white with a black border and contains the text 'syscall_module_handler'. A blue arrow points from the right side of this box to the left side of the right box. The right box is gray with a black border and contains the text 'kern_syscall_module_handler' on two lines.
