

dumper_insert

dumper_remove

free_single_dumper

```
graph LR; A[dumper_insert] --> C[free_single_dumper]; B[dumper_remove] --> C;
```

The diagram illustrates a flow where two functions, 'dumper_insert' and 'dumper_remove', both point to a single function, 'free_single_dumper'. The 'dumper_insert' and 'dumper_remove' boxes are white with black borders, while the 'free_single_dumper' box is shaded gray with a black border. Blue arrows indicate the direction of the flow from left to right.
