

ng_ether_mod_event

```
graph LR; A[ng_ether_mod_event] --> B[ng_ether_input]
```

The diagram consists of two rectangular boxes connected by a blue arrow. The left box is white with a black border and contains the text 'ng_ether_mod_event'. A blue arrow points from the right side of this box to the left side of the right box. The right box is gray with a black border and contains the text 'ng_ether_input'.
