

sctp\_timer

```
graph BT; sctp_epinfo[sctp_epinfo] -.->|addr_wq_timer| sctp_timer[sctp_timer];
```

The diagram illustrates a pointer relationship between two data structures. At the top is a white rectangular box labeled 'sctp\_timer'. At the bottom is a gray rectangular box labeled 'sctp\_epinfo'. A vertical dashed purple line connects the two boxes, starting from the bottom of the 'sctp\_epinfo' box and ending with a solid purple arrowhead pointing to the bottom of the 'sctp\_timer' box. To the right of this dashed line, the text 'addr\_wq\_timer' is written, indicating the name of the pointer field.

addr\_wq\_timer
