

geom/uzip/g\_uzip\_softc.h

```
graph BT; A[geom/uzip/g_uzip.c] --> B[geom/uzip/g_uzip_softc.h]; C[geom/uzip/g_uzip_wrkthr.c] --> B;
```

A diagram illustrating the relationship between source files and a header file. At the top is a gray box containing the header file path: `geom/uzip/g_uzip_softc.h`. Below it are two white boxes with black borders. The left box contains `geom/uzip/g_uzip.c` and the right box contains `geom/uzip/g_uzip_wrkthr.c`. Two blue arrows point from each of these source files up to the header file, indicating that both source files include or depend on the header file.
